Eco-Schools is a fundamental initiative, which encourages young people to engage in their environment by allowing them the opportunity to actively protect it. It starts in the classroom, expands to the school and eventually fosters change in the community at large.

The Eco-Schools programme extends from kindergartens to universities and is implemented in over 64 countries, involving 50,000 schools and institutions, over 17 million students and 1.3 million teachers.

Eco-Schools is an international programme of the Foundation for Environmental Education (FEE).
